Environmental Studies

Study Modules

Environmental Science MCQs provides a diverse set of multiple-choice questions generated using ChatGPT. Covering key topics like resources, pollution, energy, and policies, it's an essential tool for students and educators to enhance learning and test understanding effectively.

ENVIRONMENTAL STUDIES MCQs WITH ANSWER

BY

Dr. G. N. Rameshaiah

3.	Module 3	22.
4.	Module 4	32.
5.	Module 5	43.

MODULE 1

Introduction: Environment - Components of Environment Ecosystem: Types & Structure of Ecosystem, Balanced ecosystem Human Activities – Food, Shelter, Economic & Social Security.

Impacts of Agriculture & Housing Impacts of Industry, Mining & Transportation Environmental Impact Assessment, Sustainable Development

1. **Which of the following is NOT a component of the environment?**
   a) Atmosphere
   b) Biosphere
   c) Lithosphere
   d) Magnetosphere
   (Correct answer: d) Magnetosphere)
2. **What does the term "biosphere" include?**
   a) The living organisms and their physical environment
   b) The gaseous layer surrounding Earth
   c) Only aquatic ecosystems
   d) The Earth's core
   (Correct answer: a) The living organisms and their physical environment)
3. **Which of the following is an abiotic component of the environment?**
   a) Soil
   b) Plants
   c) Animals
   d) Microorganisms
   (Correct answer: a) Soil)
4. **Which of the following types of ecosystems is characterized by high biodiversity and abundant rainfall?**
   a) Grassland
   b) Tropical rainforest
   c) Desert
   d) Tundra
   (Correct answer: b) Tropical rainforest)
5. **In an ecosystem, decomposers play a key role by:**
   a) Breaking down organic matter into simpler compounds
   b) Producing oxygen through photosynthesis
   c) Consuming only plant material
   d) Regulating predator populations
   (Correct answer: a) Breaking down organic matter into simpler compounds)
6. **Which of the following is a primary producer in an ecosystem?**
   a) Grass

b) Lion
c) Frog
d) Decomposers
(Correct answer: a) Grass)

7. **Energy flow in an ecosystem is described as:**
   a) Cyclic
   b) Bidirectional
   c) Unidirectional
   d) Constant
   (Correct answer: c) Unidirectional)
8. **A balanced ecosystem depends on:**
   a) Equal populations of herbivores and carnivores
   b) Stable interactions between biotic and abiotic components
   c) A single dominant species
   d) Continuous human intervention
   (Correct answer: b) Stable interactions between biotic and abiotic components)
9. **Which of the following is an example of a balanced ecosystem?**
   a) A polluted lake
   b) A forest with diverse plant and animal species
   c) A city park with only ornamental plants
   d) A desert with no plant life
   (Correct answer: b) A forest with diverse plant and animal species)
10. **The primary purpose of human activities like agriculture and housing is to provide:**
    a) Economic security only
    b) Food, shelter, and social security
    c) A balanced ecosystem
    d) A decrease in human population
    (Correct answer: b) Food, shelter, and social security)
11. **Which human activity has the greatest impact on biodiversity loss?**
    a) Industrialization
    b) Deforestation
    c) Urbanization
    d) Mining
    (Correct answer: b) Deforestation)
12. **What is a key characteristic of a tropical forest ecosystem?**
    a) High levels of nutrient cycling
    b) Low biodiversity
    c) Dominance of herbivores
    d) Sparse vegetation
    (Correct answer: a) High levels of nutrient cycling)

13. **The pyramid of energy in an ecosystem is always:**
    a) Inverted
    b) Upright
    c) Circular
    d) Interchangeable
    (Correct answer: b) Upright)
14. **The primary driver of environmental imbalances in ecosystems is:**
    a) Seasonal changes
    b) Natural predator-prey relationships
    c) Human activities
    d) Stable climatic conditions
    (Correct answer: c) Human activities)
15. **Which of the following is an indirect impact of unbalanced ecosystems?**
    a) Increase in food security
    b) Spread of vector-borne diseases
    c) Reduced biodiversity
    d) Increase in water resources
    (Correct answer: b) Spread of vector-borne diseases)
16. **Which of the following is a direct impact of agriculture on the environment?**
    a) Habitat destruction
    b) Ozone layer depletion
    c) Global warming
    d) Decreased ocean salinity
    (Correct answer: a) Habitat destruction)
17. **The term "monoculture" in agriculture refers to:**
    a) Cultivating a single crop over a large area
    b) Using organic farming practices
    c) Rotating crops seasonally
    d) Farming without chemical fertilizers
    (Correct answer: a) Cultivating a single crop over a large area)
18. **Which of the following is NOT a primary effect of housing on the environment?**
    a) Land-use change
    b) Air pollution
    c) Loss of biodiversity
    d) Increase in groundwater recharge
    (Correct answer: d) Increase in groundwater recharge)
19. **Industrial activities most commonly contribute to:**
    a) Soil enrichment
    b) Air and water pollution
    c) Reduction in urbanization

d) Deforestation

(Correct answer: b) Air and water pollution)

20. **Mining activities cause which of the following environmental issues?**
    a) Soil erosion and deforestation
    b) Increase in biodiversity
    c) Reduction in global warming
    d) Stabilization of the ecosystem
    (Correct answer: a) Soil erosion and deforestation)
21. **Which of these is a major environmental impact of transportation?**
    a) Increase in greenhouse gas emissions
    b) Reduced energy consumption
    c) Enhanced biodiversity
    d) Improved air quality
    (Correct answer: a) Increase in greenhouse gas emissions)
22. **The primary purpose of Environmental Impact Assessment (EIA) is to:**
    a) Monitor economic growth
    b) Predict and mitigate environmental impacts of projects
    c) Increase industrial productivity
    d) Reduce population growth
    (Correct answer: b) Predict and mitigate environmental impacts of projects)
23. **One of the key principles of sustainable development is to:**
    a) Maximize industrial output
    b) Balance current needs with future generations' resources
    c) Promote urbanization at any cost
    d) Focus exclusively on renewable energy
    (Correct answer: b) Balance current needs with future generations' resources)
24. **Which of the following is an example of sustainable agricultural practice?**
    a) Slash-and-burn farming
    b) Using genetically modified seeds
    c) Crop rotation and conservation tillage
    d) Expanding farmland by deforestation
    (Correct answer: c) Crop rotation and conservation tillage)
25. **A major goal of Environmental Impact Assessment is to:**
    a) Prevent biodiversity loss
    b) Enhance climate regulation
    c) Identify potential environmental risks of projects
    d) Minimize urbanization
    (Correct answer: c) Identify potential environmental risks of projects)
26. **What is the role of afforestation in sustainable development?**
    a) Increasing mining productivity
    b) Enhancing soil erosion

c) Mitigating climate change and conserving biodiversity
d) Expanding industrial areas
(Correct answer: c) Mitigating climate change and conserving biodiversity)

27. **The primary objective of sustainable development is:**
    a) To improve energy consumption efficiency only
    b) To address environmental, social, and economic needs equally
    c) To eliminate the use of all natural resources
    d) To enhance urbanization
    (Correct answer: b) To address environmental, social, and economic needs equally)
28. **Which of the following transportation modes has the least environmental impact?**
    a) Private vehicles
    b) Rail transport
    c) Air travel
    d) Heavy-duty trucks
    (Correct answer: b) Rail transport)
29. **The concept of sustainable housing involves:**
    a) Using renewable energy sources
    b) Minimizing material waste during construction
    c) Enhancing energy efficiency of buildings
    d) All of the above
    (Correct answer: d) All of the above)
30. **Which international agreement focuses on promoting sustainable development globally?**
    a) Kyoto Protocol
    b) Agenda 21
    c) Montreal Protocol
    d) Paris Agreement
    (Correct answer: b) Agenda 21)
31. **Which of the following is the primary cause of agricultural runoff?**
    a) Industrial discharges
    b) Excessive use of fertilizers and pesticides
    c) Urbanization
    d) Mining activities
    (Correct answer: b) Excessive use of fertilizers and pesticides)
32. **What is the key objective of water treatment plants?**
    a) To purify water for irrigation
    b) To reduce pollutants and make water safe for use
    c) To increase water temperature

d) To prevent evaporation

(Correct answer: b) To reduce pollutants and make water safe for use)

33. **Which type of pollution is caused by untreated domestic sewage?**
    a) Noise pollution
    b) Water pollution
    c) Thermal pollution
    d) Radioactive pollution
    (Correct answer: b) Water pollution)
34. **One of the common health effects of contaminated drinking water is:**
    a) Tuberculosis
    b) Diarrhea
    c) Hypertension
    d) Lung cancer
    (Correct answer: b) Diarrhea)
35. **Which of these is an example of point-source pollution?**
    a) Urban runoff
    b) Oil spill from a pipeline
    c) Agricultural pesticide runoff
    d) Soil erosion
    (Correct answer: b) Oil spill from a pipeline)
36. **The main source of noise pollution in urban areas is:**
    a) Agricultural machinery
    b) Transportation systems
    c) Industrial farming
    d) Rainfall
    (Correct answer: b) Transportation systems)
37. **Land pollution due to improper waste management can lead to:**
    a) Improved soil fertility
    b) Increased groundwater contamination
    c) Lower levels of air pollution
    d) Decreased biodiversity
    (Correct answer: b) Increased groundwater contamination)
38. **Which type of pollutant is responsible for acid rain?**
    a) Sulfur dioxide and nitrogen oxides
    b) Carbon monoxide and ozone
    c) Lead and mercury
    d) Chlorofluorocarbons
    (Correct answer: a) Sulfur dioxide and nitrogen oxides)
39. **Which of the following contributes most to eutrophication?**
    a) Industrial oils
    b) Nitrogen and phosphorus from fertilizers

c) Microplastics
d) Sand deposition
(Correct answer: b) Nitrogen and phosphorus from fertilizers)

40. **Which international agreement addresses the problem of marine pollution?**
a) Kyoto Protocol
b) MARPOL Convention
c) Montreal Protocol
d) Paris Agreement
(Correct answer: b) MARPOL Convention)

41. **What is leachate in the context of landfills?**
a) A type of recyclable material
b) Contaminated liquid that seeps out of waste
c) Organic waste that decomposes
d) Emissions of methane gas
(Correct answer: b) Contaminated liquid that seeps out of waste)

42. **Which of these pollutants is responsible for "blue baby syndrome"?**
a) Lead
b) Nitrates
c) Mercury
d) Chlorine
(Correct answer: b) Nitrates)

43. **Noise above which decibel level is considered harmful to human hearing?**
a) 50 dB
b) 85 dB
c) 100 dB
d) 120 dB
(Correct answer: b) 85 dB)

44. **A major public health concern caused by open dumpsites is:**
a) Acidification of soil
b) Spread of vector-borne diseases
c) Thermal pollution
d) Decreased biodiversity
(Correct answer: b) Spread of vector-borne diseases)

45. **Which of the following techniques helps in reducing water pollution?**
a) Constructing more dams
b) Rainwater harvesting and waste treatment
c) Increasing industrial output
d) Clearing wetlands for urbanization
(Correct answer: b) Rainwater harvesting and waste treatment)

46. **What is one of the primary effects of rapid urbanization?**
a) Increased forest cover

b) Strain on urban infrastructure
c) Decrease in pollution levels
d) Improved air quality
(Correct answer: b) Strain on urban infrastructure)

47. **Which of the following factors contributes most to population growth in developing countries?**
a) High literacy rates
b) Improved healthcare
c) Decreased agricultural output
d) Low industrialization
(Correct answer: b) Improved healthcare)

48. **Urban sprawl refers to:**
a) Increase in the height of urban buildings
b) Unplanned expansion of cities into rural areas
c) Decrease in the size of urban areas
d) Urban areas becoming energy-efficient
(Correct answer: b) Unplanned expansion of cities into rural areas)

49. **Which of these is a major objective of wastewater management?**
a) Increase industrial discharge
b) Reduce waterborne diseases
c) Eliminate rainwater harvesting systems
d) Increase salinity of freshwater
(Correct answer: b) Reduce waterborne diseases)

50. **A common method for managing solid waste is:**
a) Open dumping
b) Landfilling with proper treatment
c) Burning waste in open areas
d) Releasing waste into rivers
(Correct answer: b) Landfilling with proper treatment)

51. **What is the major environmental impact of poor land management?**
a) Overpopulation
b) Soil degradation and erosion
c) Increase in atmospheric carbon levels
d) Decrease in crop diversity
(Correct answer: b) Soil degradation and erosion)

52. **The "three Rs" of sustainable resource management are:**
a) Reduce, Reuse, Recycle
b) Recycle, Replant, Reclaim
c) Reduce, Replace, Remove
d) Replant, Repair, Restore
(Correct answer: a) Reduce, Reuse, Recycle)

53. **Which practice promotes sustainable land management?**
    a) Slash-and-burn agriculture
    b) Conservation tillage
    c) Expanding urbanization
    d) Overgrazing livestock
    (Correct answer: b) Conservation tillage)
54. **An increase in global population has the greatest impact on:**
    a) Global carbon sequestration
    b) Strain on freshwater availability
    c) Increase in forest biodiversity
    d) Reduction in urban areas
    (Correct answer: b) Strain on freshwater availability)
55. **Which of the following is a solution to rapid urbanization challenges?**
    a) Developing renewable energy sources
    b) Expanding urban areas into forests
    c) Increasing fossil fuel use
    d) Promoting unregulated development
    (Correct answer: a) Developing renewable energy sources)
56. **What is a key benefit of integrated solid waste management (ISWM)?**
    a) Reduces urban waste and promotes recycling
    b) Eliminates the need for urban planning
    c) Increases greenhouse gas emissions
    d) Enhances reliance on open dumping
    (Correct answer: a) Reduces urban waste and promotes recycling)
57. **A major contributor to water scarcity in urban areas is:**
    a) Overuse of industrial water
    b) Improper water pricing policies
    c) Lack of wastewater treatment facilities
    d) All of the above
    (Correct answer: d) All of the above)
58. **Smart water grids are primarily designed to:**
    a) Reduce the demand for water resources
    b) Promote efficient water distribution and monitoring
    c) Increase water extraction from aquifers
    d) Eliminate wastewater treatment plants
    (Correct answer: b) Promote efficient water distribution and monitoring)
59. **What is a major challenge of wastewater reuse?**
    a) Increasing water salinity
    b) Lack of advanced treatment facilities
    c) Over-dependence on surface water

d) Reduction in water recycling rates

(Correct answer: b) Lack of advanced treatment facilities)

60. **Population explosion affects biodiversity by:**

a) Promoting reforestation

b) Accelerating habitat destruction

c) Increasing food production efficiency

d) Stabilizing ecosystems

(Correct answer: b) Accelerating habitat destruction)

MODULE 2

Natural Resources, Water resources – Availability & Quality aspects, Water borne diseases & water induced diseases, Fluoride problem in drinking water Mineral resources, Forest Wealth Material Cycles – Carbon Cycle, Nitrogen Cycle & Sulphur Cycle

Energy – Different types of energy, Conventional sources & Non-Conventional sources of energy Solar energy, Hydro electric energy, Wind Energy, Nuclear energy, Biomass & Biogas Fossil Fuels, Hydrogen as an alternative energy

1. **What percentage of Earth's water is available as freshwater?**
   a) 2.5%
   b) 10%
   c) 25%
   d) 50%
   (Correct answer: a) 2.5%)

2. **Which of the following is an example of a waterborne disease?**
   a) Malaria
   b) Cholera
   c) Asthma
   d) Skin cancer
   (Correct answer: b) Cholera)

3. **Fluoride contamination in drinking water primarily affects:**
   a) Respiratory system
   b) Bones and teeth
   c) Digestive system
   d) Nervous system
   (Correct answer: b) Bones and teeth)

4. **Which of the following is a key mineral resource in India?**
   a) Bauxite
   b) Tantalum
   c) Lithium
   d) Nickel
   (Correct answer: a) Bauxite)

5. **Deforestation leads to which of the following environmental issues?**
   a) Increased biodiversity
   b) Soil erosion and loss of forest wealth
   c) Reduction in atmospheric carbon dioxide
   d) Higher groundwater recharge
   (Correct answer: b) Soil erosion and loss of forest wealth)

6. **What is the primary purpose of the carbon cycle in nature?**
   a) To convert water into oxygen
   b) To regulate carbon dioxide levels in the atmosphere
   c) To fix nitrogen in soil
   d) To decompose sulfur compounds
   (Correct answer: b) To regulate carbon dioxide levels in the atmosphere)

7. **Nitrogen fixation refers to:**
   a) The conversion of atmospheric nitrogen into usable forms by bacteria
   b) The decomposition of nitrogen compounds in the soil
   c) The absorption of nitrogen gas by plants
   d) The release of nitrogen oxides into the air
   (Correct answer: a) The conversion of atmospheric nitrogen into usable forms by bacteria)

8. **Sulfur dioxide, a key part of the sulfur cycle, is released during:**
   a) Photosynthesis
   b) Burning of fossil fuels
   c) Water purification
   d) Nitrogen fixation
   (Correct answer: b) Burning of fossil fuels)

9. **Which of these activities contributes to water resource depletion?**
   a) Groundwater recharge projects
   b) Rainwater harvesting
   c) Over-extraction of groundwater
   d) Sustainable agricultural practices
   (Correct answer: c) Over-extraction of groundwater)

10. **The process by which forests are replenished naturally is called:**
    a) Deforestation
    b) Afforestation
    c) Reforestation
    d) Biodiversity loss
    (Correct answer: c) Reforestation)

11. **Which element is essential in the nitrogen cycle for plant growth?**
    a) Oxygen
    b) Nitrogen
    c) Carbon
    d) Sulfur
    (Correct answer: b) Nitrogen)

12. **Excess fluoride in drinking water can cause:**
    a) Dental fluorosis
    b) Hypertension
    c) Increased waterborne diseases
    d) Nitrogen imbalance in soil
    (Correct answer: a) Dental fluorosis)

13. **Which of the following is a direct impact of mining activities?**
    a) Reduced deforestation
    b) Soil erosion and habitat destruction
    c) Increased water conservation
    d) Lower air pollution
    (Correct answer: b) Soil erosion and habitat destruction)

14. **The largest carbon reservoir on Earth is found in:**
    a) The atmosphere
    b) The oceans
    c) Forests
    d) Fossil fuels
    (Correct answer: b) The oceans)

31. **Which of the following is a significant cause of water scarcity?**
    a) High rainfall in coastal regions
    b) Overextraction of groundwater
    c) Reduced industrial demand for water
    d) Decline in urbanization
    (Correct answer: b) Overextraction of groundwater)

32. **The process of converting atmospheric nitrogen into ammonia by microorganisms is known as:**
    a) Denitrification
    b) Nitrification
    c) Nitrogen fixation
    d) Ammonification
    (Correct answer: c) Nitrogen fixation)

33. **Which of the following is an example of a renewable natural resource?**
    a) Fossil fuels
    b) Forests
    c) Minerals like gold
    d) Uranium
    (Correct answer: b) Forests)

34. **Which disease is considered water-induced rather than waterborne?**
    a) Cholera
    b) Malaria
    c) Hepatitis A
    d) Typhoid
    (Correct answer: b) Malaria)

35. **What is the primary environmental concern associated with excessive fluoride in drinking water?**
    a) Aquatic biodiversity loss
    b) Soil salinization
    c) Human health issues like skeletal fluorosis
    d) Increased greenhouse gas emissions
    (Correct answer: c) Human health issues like skeletal fluorosis)

36. **Which cycle is responsible for regulating oxygen and carbon dioxide levels in the atmosphere?**
    a) Nitrogen cycle
    b) Carbon cycle
    c) Sulfur cycle
    d) Water cycle
    (Correct answer: b) Carbon cycle)

37. **The term "aquifer" refers to:**
    a) A source of surface water
    b) Underground layers of rock that store water
    c) Artificial reservoirs used for agriculture
    d) Forests that regulate rainfall patterns
    (Correct answer: b) Underground layers of rock that store water)

38. **Which of the following contributes to the disruption of the nitrogen cycle?**
    a) Excessive use of nitrogen-based fertilizers
    b) Overharvesting of forests
    c) Increased combustion of fossil fuels
    d) Reduced sulfur emissions
    (Correct answer: a) Excessive use of nitrogen-based fertilizers)

39. **The main consequence of deforestation on the water cycle is:**
    a) Increased rainfall in urban areas
    b) Disruption of evapotranspiration and reduced groundwater recharge
    c) Enhanced nitrogen fixation in soil
    d) Stabilization of river flow
    (Correct answer: b) Disruption of evapotranspiration and reduced groundwater recharge)

40. **Which mineral is primarily used in the production of aluminum?**
    a) Hematite
    b) Bauxite
    c) Quartz
    d) Limestone
    (Correct answer: b) Bauxite)
41. **The excessive release of sulfur compounds into the atmosphere can result in:**
    a) Acid rain formation
    b) Nitrogen fixation
    c) Increased ozone layer thickness
    d) Enhanced photosynthesis
    (Correct answer: a) Acid rain formation)
42. **The largest single use of freshwater globally is for:**
    a) Domestic purposes
    b) Industrial processes
    c) Agricultural irrigation
    d) Hydroelectric power generation
    (Correct answer: c) Agricultural irrigation)
43. **Reforestation primarily helps in:**
    a) Reducing deforestation rates
    b) Restoring lost biodiversity and improving soil fertility
    c) Promoting monoculture farming
    d) Increasing mining activities
    (Correct answer: b) Restoring lost biodiversity and improving soil fertility)
44. **Which natural resource is a key component of fossil fuel formation?**
    a) Sandstone
    b) Organic matter buried under high pressure and temperature
    c) Surface water sediments
    d) Volcanic rocks
    (Correct answer: b) Organic matter buried under high pressure and temperature)
45. **Which of the following is a key consequence of excessive fluoride in drinking water?**
    a) Increased rainfall
    b) Soil erosion
    c) Skeletal fluorosis
    d) Higher groundwater levels
    (Correct answer: c) Skeletal fluorosis)
46. **The nitrogen cycle is crucial because it:**
    a) Converts nitrogen gas into carbon dioxide
    b) Fixes atmospheric nitrogen into usable forms for plants

c) Produces sulfur compounds in the atmosphere
d) Converts water vapor into liquid nitrogen
(Correct answer: b) Fixes atmospheric nitrogen into usable forms for plants)

47. **Which natural resource is a key component of fossil fuel formation?**
a) Sandstone
b) Organic matter buried under pressure
c) River sediments
d) Limestone
(Correct answer: b) Organic matter buried under pressure)

48. **What is the primary environmental impact of mining activities?**
a) Increased forest cover
b) Soil erosion and habitat destruction
c) Improved groundwater recharge
d) Enhanced atmospheric oxygen
(Correct answer: b) Soil erosion and habitat destruction)

49. **The carbon cycle regulates:**
a) Soil nitrogen content
b) Atmospheric levels of carbon dioxide and oxygen
c) Groundwater storage
d) Mineral resource availability
(Correct answer: b) Atmospheric levels of carbon dioxide and oxygen)

50. **Excessive irrigation leads to:**
a) Improved soil fertility
b) Waterlogging and salinization
c) Enhanced crop productivity
d) Biodiversity restoration
(Correct answer: b) Waterlogging and salinization)

51. **Which disease is waterborne?**
a) Malaria
b) Cholera
c) Tuberculosis
d) Skin cancer
(Correct answer: b) Cholera)

52. **What is the main cause of acid rain?**
a) Methane emissions
b) Sulfur dioxide and nitrogen oxides
c) Carbon monoxide
d) Ozone depletion
(Correct answer: b) Sulfur dioxide and nitrogen oxides)

53. **The term “aquifer” refers to:**
a) A surface water source

b) Underground rock layers storing water
c) Artificial lakes for irrigation
d) Rainwater harvesting systems
(Correct answer: b) Underground rock layers storing water)

54. **Which process helps restore forest ecosystems?**
a) Deforestation
b) Reforestation
c) Urbanization
d) Monoculture farming
(Correct answer: b) Reforestation)

55. **What is the primary advantage of solar energy?**
a) No greenhouse gas emissions
b) Requires minimal sunlight
c) Provides continuous power at night
d) Is a non-renewable source
(Correct answer: a) No greenhouse gas emissions)

56. **Biogas production involves:**
a) Combustion of organic matter
b) Anaerobic digestion of organic waste
c) Photovoltaic cell technology
d) Nuclear fission
(Correct answer: b) Anaerobic digestion of organic waste)

57. **Which energy source is most suitable for desert regions?**
a) Wind energy
b) Tidal energy
c) Solar energy
d) Geothermal energy
(Correct answer: c) Solar energy)

58. **Hydrogen is considered a sustainable energy source because:**
a) It emits only water as a byproduct
b) It generates carbon dioxide
c) It is mined directly from the Earth
d) It requires fossil fuels for production
(Correct answer: a) It emits only water as a byproduct)

59. **The main disadvantage of nuclear energy is:**
a) High carbon emissions
b) Generation of radioactive waste
c) Low energy efficiency
d) Dependency on sunlight
(Correct answer: b) Generation of radioactive waste)

60. **Tidal energy is primarily derived from:**
    a) Photosynthesis in marine plants
    b) Gravitational forces of the Moon and Sun
    c) High-pressure ocean currents
    d) Heat from volcanic eruptions
    (Correct answer: b) Gravitational forces of the Moon and Sun)
61. **Which of the following is a non-renewable energy source?**
    a) Geothermal energy
    b) Coal
    c) Wind energy
    d) Biomass energy
    (Correct answer: b) Coal)
62. **Wind energy is converted into electricity using:**
    a) Combustion chambers
    b) Hydroelectric dams
    c) Wind turbines
    d) Nuclear reactors
    (Correct answer: c) Wind turbines)
63. **The efficiency of solar panels is primarily influenced by:**
    a) Sunlight intensity
    b) Wind speed
    c) Fossil fuel availability
    d) Soil composition
    (Correct answer: a) Sunlight intensity)
64. **Which of the following renewable energy sources has the lowest carbon footprint?**
    a) Biomass energy
    b) Wind energy
    c) Hydroelectric power
    d) Nuclear energy
    (Correct answer: b) Wind energy)
65. **Which resource is used in the production of aluminum?**
    a) Quartz
    b) Bauxite
    c) Limestone
    d) Granite
    (Correct answer: b) Bauxite)
66. **Which energy source is generated from organic materials?**
    a) Biomass
    b) Tidal energy
    c) Nuclear fusion

d) Geothermal energy
(Correct answer: a) Biomass)

67. **A disadvantage of hydroelectric power is:**
a) High greenhouse gas emissions
b) Displacement of communities and ecological disruption
c) Limited energy output
d) Dependence on coal reserves
(Correct answer: b) Displacement of communities and ecological disruption)

68. **Which of the following is an example of passive renewable energy?**
a) Nuclear fission
b) Solar heating
c) Fossil fuel combustion
d) Biomass gasification
(Correct answer: b) Solar heating)

69. **The sulfur cycle is primarily impacted by:**
a) Increased afforestation
b) Combustion of fossil fuels
c) Nitrogen fertilizers
d) Solar radiation
(Correct answer: b) Combustion of fossil fuels)

70. **The primary use of geothermal energy is:**
a) Water purification
b) Heating and electricity generation
c) Wind turbine efficiency
d) Fueling biomass reactors
(Correct answer: b) Heating and electricity generation)

71. **What is a direct environmental impact of deforestation?**
a) Increased groundwater recharge
b) Habitat destruction and soil erosion
c) Enhanced photosynthesis rates
d) Lower carbon dioxide levels
(Correct answer: b) Habitat destruction and soil erosion)

72. **Which of the following energy sources is derived from Earth's internal heat?**
a) Biomass
b) Geothermal energy
c) Wind energy
d) Solar power
(Correct answer: b) Geothermal energy)

73. **A major environmental concern of fossil fuel usage is:**
a) Ozone layer recovery
b) Global warming due to carbon emissions

c) Increase in groundwater recharge
d) Reduction in air quality improvement efforts
(Correct answer: b) Global warming due to carbon emissions)

74. **Which of the following practices can sustain forest wealth?**
a) Clear-cutting for timber
b) Agroforestry and selective logging
c) Expansion of urban areas
d) Burning forest residues
(Correct answer: b) Agroforestry and selective logging)

MODULE 3

Environmental Pollution – Water Pollution, Noise pollution, Land Pollution, Public Health Aspects

Global Environmental Issues: Population Growth, Urbanization, Land Management, Water & Waste Water Management

1. **Which of the following is a major cause of water pollution?**
   a) Overfishing
   b) Deforestation
   c) Industrial effluents
   d) Excessive rainfall
   (Correct answer: c) Industrial effluents)

2. **The biochemical oxygen demand (BOD) of water is a measure of:**
   a) The amount of oxygen consumed by microorganisms
   b) The chemical composition of pollutants
   c) The pH level of water
   d) The hardness of water
   (Correct answer: a) The amount of oxygen consumed by microorganisms)

3. **Which of these is an example of non-point source water pollution?**
   a) Leakage from a sewage pipe
   b) Fertilizer runoff from agricultural fields
   c) Discharge from a factory outlet
   d) Oil spill from a tanker
   (Correct answer: b) Fertilizer runoff from agricultural fields)

4. **Noise pollution is measured in units of:**
   a) Decibels
   b) Hertz
   c) Pascals
   d) Lumens
   (Correct answer: a) Decibels)

5. **Which of these is NOT a health effect of prolonged exposure to high noise levels?**
   a) Hypertension
   b) Hearing loss
   c) Skin irritation
   d) Sleep disturbances
   (Correct answer: c) Skin irritation)

6. **Which of the following is a primary source of land pollution?**
   a) Use of pesticides
   b) Noise from heavy machinery
   c) Oil spillage in oceans
   d) Sulfur dioxide emissions
   (Correct answer: a) Use of pesticides)

7. **A key health risk associated with land pollution is:**
   a) Asthma from air contaminants
   b) Contaminated water leading to cholera
   c) Toxic soil causing lead poisoning
   d) Hearing loss due to noise
   (Correct answer: c) Toxic soil causing lead poisoning)

8. **Eutrophication in water bodies is primarily caused by:**
   a) Excess oxygen
   b) Heavy metals
   c) Nutrient overloading
   d) Microbial activity
   (Correct answer: c) Nutrient overloading)

9. **The "safe limit" for noise levels in residential areas during the daytime, as prescribed by WHO, is approximately:**
   a) 55 dB
   b) 70 dB
   c) 45 dB
   d) 30 dB
   (Correct answer: a) 55 dB)

10. **The leading contributor to groundwater contamination is:**
    a) Deforestation
    b) Urban runoff
    c) Industrial waste dumping
    d) Plastic pollution
    (Correct answer: c) Industrial waste dumping)

11. **Which type of pollution is most likely to affect mental health and stress levels?**
    a) Water pollution
    b) Noise pollution
    c) Air pollution
    d) Land pollution
    (Correct answer: b) Noise pollution)

12. **What is the primary source of heavy metal contamination in soil?**
    a) Agricultural fertilizers
    b) Urban runoff
    c) Mining activities
    d) Natural disasters
    (Correct answer: c) Mining activities)

13. **Which of the following diseases is most commonly associated with water pollution?**
    a) Tuberculosis
    b) Hepatitis A
    c) Skin cancer
    d) Asthma
    (Correct answer: b) Hepatitis A)

14. **The main cause of thermal pollution in water bodies is:**
    a) Industrial discharge of hot water
    b) Excessive fishing activity
    c) Nutrient runoff
    d) Salinity increase
    (Correct answer: a) Industrial discharge of hot water)

15. **Landfills primarily contribute to which type of pollution?**
    a) Air pollution
    b) Noise pollution
    c) Land pollution
    d) Thermal pollution
    (Correct answer: c) Land pollution)

16. **Rapid population growth directly leads to which of the following issues?**
    a) Reduced greenhouse gas emissions
    b) Decreased urban sprawl
    c) Increased strain on natural resources
    d) Improved biodiversity
    (Correct answer: c) Increased strain on natural resources)

17. **Urbanization primarily contributes to:**
    a) Soil erosion in rural areas
    b) Improved water quality
    c) Habitat destruction
    d) Decreased deforestation rates
    (Correct answer: c) Habitat destruction)

18. **One of the key challenges of wastewater management is:**
    a) High levels of dissolved oxygen in water
    b) Disposal of untreated sewage
    c) Low cost of treatment plants
    d) Increased aquifer recharge
    (Correct answer: b) Disposal of untreated sewage)

19. **Which of the following is NOT a global environmental issue?**
    a) Overpopulation
    b) Urbanization
    c) Efficient resource recycling
    d) Land degradation
    (Correct answer: c) Efficient resource recycling)

20. **The term "urban heat island effect" refers to:**
    a) Increase in temperature in rural areas due to deforestation
    b) Temperature increase in urban areas due to human activities
    c) Heat generated by volcanic activity in cities
    d) Cooling of urban areas due to green roofs
    (Correct answer: b) Temperature increase in urban areas due to human activities)

21. **The primary goal of sustainable land management is to:**
    a) Increase deforestation for agriculture
    b) Enhance productivity while preserving soil health
    c) Use fertilizers and pesticides
    d) Expand urban areas
    (Correct answer: b) Enhance productivity while preserving soil health)

22. **Population growth affects water availability by:**
    a) Increasing water table levels
    b) Improving water purification processes
    c) Increasing water demand and pollution
    d) Reducing irrigation needs
    (Correct answer: c) Increasing water demand and pollution)

23. **Integrated water resources management (IWRM) focuses on:**
    a) Building large dams
    b) Coordinating land and water management
    c) Drilling deeper wells
    d) Replacing rivers with canals
    (Correct answer: b) Coordinating land and water management)

24. **What is the major environmental impact of unmanaged wastewater?**
    a) Loss of biodiversity in aquatic ecosystems

b) Reduced groundwater levels
c) Increase in industrial productivity
d) Stabilization of pH levels in water
(Correct answer: a) Loss of biodiversity in aquatic ecosystems)

25. **Which of these is a potential solution to the challenges posed by rapid urbanization?**
a) Developing green infrastructure
b) Increasing urban sprawl
c) Reducing public transport
d) Limiting access to renewable energy
(Correct answer: a) Developing green infrastructure)

26. **One of the main challenges in managing population growth is:**
a) Availability of education
b) Access to clean water and sanitation
c) Expansion of desert areas
d) Stabilization of energy consumption
(Correct answer: b) Access to clean water and sanitation)

27. **The purpose of water reuse in wastewater management is to:**
a) Reduce industrial production
b) Improve drinking water quality
c) Conserve freshwater resources
d) Avoid using rainwater harvesting
(Correct answer: c) Conserve freshwater resources)

28. **The concept of "smart cities" is aimed at:**
a) Expanding urban areas without infrastructure
b) Using technology to promote sustainable development
c) Increasing population density without planning
d) Reducing reliance on renewable energy
(Correct answer: b) Using technology to promote sustainable development)

29. **Which of the following is a direct effect of urbanization on water resources?**
a) Increased aquifer recharge
b) Decrease in water demand
c) Depletion of groundwater resources
d) Stabilization of river flow
(Correct answer: c) Depletion of groundwater resources)

30. **Land management strategies include:**
a) Overgrazing by livestock
b) Preventing soil erosion and promoting afforestation

c) Expansion of agricultural lands into forests
d) Urbanizing all rural areas
(Correct answer: b) Preventing soil erosion and promoting afforestation)

31. **Which of the following is the primary cause of agricultural runoff?**
a) Industrial discharges
b) Excessive use of fertilizers and pesticides
c) Urbanization
d) Mining activities
(Correct answer: b) Excessive use of fertilizers and pesticides)

32. **What is the key objective of water treatment plants?**
a) To purify water for irrigation
b) To reduce pollutants and make water safe for use
c) To increase water temperature
d) To prevent evaporation
(Correct answer: b) To reduce pollutants and make water safe for use)

33. **Which type of pollution is caused by untreated domestic sewage?**
a) Noise pollution
b) Water pollution
c) Thermal pollution
d) Radioactive pollution
(Correct answer: b) Water pollution)

34. **One of the common health effects of contaminated drinking water is:**
a) Tuberculosis
b) Diarrhea
c) Hypertension
d) Lung cancer
(Correct answer: b) Diarrhea)

35. **Which of these is an example of point-source pollution?**
a) Urban runoff
b) Oil spill from a pipeline
c) Agricultural pesticide runoff
d) Soil erosion
(Correct answer: b) Oil spill from a pipeline)

36. **The main source of noise pollution in urban areas is:**
a) Agricultural machinery
b) Transportation systems
c) Industrial farming

d) Rainfall
(Correct answer: b) Transportation systems)

37. **Land pollution due to improper waste management can lead to:**
a) Improved soil fertility
b) Increased groundwater contamination
c) Lower levels of air pollution
d) Decreased biodiversity
(Correct answer: b) Increased groundwater contamination)

38. **Which type of pollutant is responsible for acid rain?**
a) Sulfur dioxide and nitrogen oxides
b) Carbon monoxide and ozone
c) Lead and mercury
d) Chlorofluorocarbons
(Correct answer: a) Sulfur dioxide and nitrogen oxides)

39. **Which of the following contributes most to eutrophication?**
a) Industrial oils
b) Nitrogen and phosphorus from fertilizers
c) Microplastics
d) Sand deposition
(Correct answer: b) Nitrogen and phosphorus from fertilizers)

40. **Which international agreement addresses the problem of marine pollution?**
a) Kyoto Protocol
b) MARPOL Convention
c) Montreal Protocol
d) Paris Agreement
(Correct answer: b) MARPOL Convention)

41. **What is leachate in the context of landfills?**
a) A type of recyclable material
b) Contaminated liquid that seeps out of waste
c) Organic waste that decomposes
d) Emissions of methane gas
(Correct answer: b) Contaminated liquid that seeps out of waste)

42. **Which of these pollutants is responsible for "blue baby syndrome"?**
a) Lead
b) Nitrates
c) Mercury
d) Chlorine
(Correct answer: b) Nitrates)

43. **Noise above which decibel level is considered harmful to human hearing?**
    a) 50 dB
    b) 85 dB
    c) 100 dB
    d) 120 dB
    (Correct answer: b) 85 dB)

44. **A major public health concern caused by open dumpsites is:**
    a) Acidification of soil
    b) Spread of vector-borne diseases
    c) Thermal pollution
    d) Decreased biodiversity
    (Correct answer: b) Spread of vector-borne diseases)

45. **Which of the following techniques helps in reducing water pollution?**
    a) Constructing more dams
    b) Rainwater harvesting and waste treatment
    c) Increasing industrial output
    d) Clearing wetlands for urbanization
    (Correct answer: b) Rainwater harvesting and waste treatment)

46. **What is one of the primary effects of rapid urbanization?**
    a) Increased forest cover
    b) Strain on urban infrastructure
    c) Decrease in pollution levels
    d) Improved air quality
    (Correct answer: b) Strain on urban infrastructure)

47. **Which of the following factors contributes most to population growth in developing countries?**
    a) High literacy rates
    b) Improved healthcare
    c) Decreased agricultural output
    d) Low industrialization
    (Correct answer: b) Improved healthcare)

48. **Urban sprawl refers to:**
    a) Increase in the height of urban buildings
    b) Unplanned expansion of cities into rural areas
    c) Decrease in the size of urban areas
    d) Urban areas becoming energy-efficient
    (Correct answer: b) Unplanned expansion of cities into rural areas)

49. **Which of these is a major objective of wastewater management?**
    a) Increase industrial discharge
    b) Reduce waterborne diseases
    c) Eliminate rainwater harvesting systems
    d) Increase salinity of freshwater
    (Correct answer: b) Reduce waterborne diseases)

50. **A common method for managing solid waste is:**
    a) Open dumping
    b) Landfilling with proper treatment
    c) Burning waste in open areas
    d) Releasing waste into rivers
    (Correct answer: b) Landfilling with proper treatment)

51. **What is the major environmental impact of poor land management?**
    a) Overpopulation
    b) Soil degradation and erosion
    c) Increase in atmospheric carbon levels
    d) Decrease in crop diversity
    (Correct answer: b) Soil degradation and erosion)

52. **The "three Rs" of sustainable resource management are:**
    a) Reduce, Reuse, Recycle
    b) Recycle, Replant, Reclaim
    c) Reduce, Replace, Remove
    d) Replant, Repair, Restore
    (Correct answer: a) Reduce, Reuse, Recycle)

53. **Which practice promotes sustainable land management?**
    a) Slash-and-burn agriculture
    b) Conservation tillage
    c) Expanding urbanization
    d) Overgrazing livestock
    (Correct answer: b) Conservation tillage)

54. **An increase in global population has the greatest impact on:**
    a) Global carbon sequestration
    b) Strain on freshwater availability
    c) Increase in forest biodiversity
    d) Reduction in urban areas
    (Correct answer: b) Strain on freshwater availability)

55. **Which of the following is a solution to rapid urbanization challenges?**
    a) Developing renewable energy sources

b) Expanding urban areas into forests
c) Increasing fossil fuel use
d) Promoting unregulated development
(Correct answer: a) Developing renewable energy sources)

56. **What is a key benefit of integrated solid waste management (ISWM)?**
a) Reduces urban waste and promotes recycling
b) Eliminates the need for urban planning
c) Increases greenhouse gas emissions
d) Enhances reliance on open dumping
(Correct answer: a) Reduces urban waste and promotes recycling)

57. **A major contributor to water scarcity in urban areas is:**
a) Overuse of industrial water
b) Improper water pricing policies
c) Lack of wastewater treatment facilities
d) All of the above
(Correct answer: d) All of the above)

58. **Smart water grids are primarily designed to:**
a) Reduce the demand for water resources
b) Promote efficient water distribution and monitoring
c) Increase water extraction from aquifers
d) Eliminate wastewater treatment plants
(Correct answer: b) Promote efficient water distribution and monitoring)

59. **What is a major challenge of wastewater reuse?**
a) Increasing water salinity
b) Lack of advanced treatment facilities
c) Over-dependence on surface water
d) Reduction in water recycling rates
(Correct answer: b) Lack of advanced treatment facilities)

60. **Population explosion affects biodiversity by:**
a) Promoting reforestation
b) Accelerating habitat destruction
c) Increasing food production efficiency
d) Stabilizing ecosystems
(Correct answer: b) Accelerating habitat destruction)

MODULE 4

Air Pollution & Automobile Pollution: Definition, Effects – Global Warming, Acid rain & Ozone layer depletion, Controlling measures

Solid Waste Management, E - Waste Management & Biomedical Waste Management - Sources, Characteristics & Disposal methods.

1. **Which of the following is a primary pollutant in air pollution?**
   a) Ozone
   b) Sulfur dioxide
   c) Peroxyacetyl nitrate (PAN)
   d) Nitric acid
   (Correct answer: b) Sulfur dioxide)

2. **The primary cause of acid rain is the presence of:**
   a) Methane and carbon dioxide
   b) Sulfur dioxide and nitrogen oxides
   c) Hydrocarbons and ozone
   d) Lead and mercury
   (Correct answer: b) Sulfur dioxide and nitrogen oxides)

3. **Which of the following is NOT an effect of global warming?**
   a) Melting of polar ice caps
   b) Increased frequency of hurricanes
   c) Depletion of freshwater resources
   d) Formation of ozone in the stratosphere
   (Correct answer: d) Formation of ozone in the stratosphere)

4. **The "greenhouse effect" refers to:**
   a) The trapping of heat by greenhouse gases in the Earth's atmosphere
   b) The increase in plant growth due to carbon dioxide
   c) The depletion of the ozone layer
   d) The absorption of ultraviolet radiation
   (Correct answer: a) The trapping of heat by greenhouse gases in the Earth's atmosphere)

5. **Ozone layer depletion is mainly caused by:**
   a) Carbon dioxide
   b) Chlorofluorocarbons (CFCs)
   c) Methane
   d) Ground-level ozone
   (Correct answer: b) Chlorofluorocarbons (CFCs)

6. **Which of the following is a secondary pollutant?**
   a) Carbon monoxide
   b) Nitrogen dioxide
   c) Ozone
   d) Sulfur dioxide
   (Correct answer: c) Ozone)

7. **Which of the following gases is a major contributor to global warming?**
   a) Oxygen
   b) Methane
   c) Nitrogen
   d) Sulfur dioxide
   (Correct answer: b) Methane)

8. **The Montreal Protocol was established to address:**
   a) Air pollution from automobiles
   b) Global warming
   c) Ozone layer depletion
   d) Acid rain
   (Correct answer: c) Ozone layer depletion)

9. **What is the primary source of automobile pollution?**
   a) Particulate matter from industrial plants
   b) Carbon monoxide, hydrocarbons, and nitrogen oxides from vehicle emissions
   c) Sulfur dioxide from refineries
   d) Methane from landfills
   (Correct answer: b) Carbon monoxide, hydrocarbons, and nitrogen oxides from vehicle emissions)

10. **The Kyoto Protocol aims to:**
    a) Control emissions of greenhouse gases
    b) Regulate water pollution
    c) Promote afforestation
    d) Reduce urban sprawl
    (Correct answer: a) Control emissions of greenhouse gases)

11. **The main environmental effect of acid rain is:**
    a) Damage to the ozone layer
    b) Reduction in atmospheric oxygen levels
    c) Soil and water acidification
    d) Increased plant growth
    (Correct answer: c) Soil and water acidification)

12. **Which device is used in vehicles to reduce harmful emissions?**
    a) Catalytic converter
    b) Air filter
    c) Radiator
    d) Exhaust manifold
    (Correct answer: a) Catalytic converter)

13. **A common effect of global warming is:**
    a) Reduced greenhouse gas emissions
    b) Melting of glaciers and rising sea levels
    c) Reduction in Earth's temperature
    d) Decrease in desertification
    (Correct answer: b) Melting of glaciers and rising sea levels)

14. **The depletion of the ozone layer leads to an increase in:**
    a) Ultraviolet radiation reaching the Earth's surface
    b) Atmospheric pressure
    c) Carbon dioxide levels in the stratosphere
    d) Global cooling
    (Correct answer: a) Ultraviolet radiation reaching the Earth's surface)

15. **Which of the following measures can reduce air pollution from automobiles?**
    a) Promoting public transportation and electric vehicles
    b) Increasing the number of gasoline-powered vehicles
    c) Eliminating urban green belts
    d) Encouraging the use of diesel engines
    (Correct answer: a) Promoting public transportation and electric vehicles)

16. **Which of the following is an example of municipal solid waste?**
    a) Industrial effluents
    b) Plastic packaging from households
    c) Used syringes from hospitals
    d) Batteries from electronic devices
    (Correct answer: b) Plastic packaging from households)

17. **The primary characteristic of biomedical waste is that it is:**
    a) Non-hazardous
    b) Generated by healthcare activities and potentially infectious
    c) Produced in industrial plants
    d) Recyclable without treatment
    (Correct answer: b) Generated by healthcare activities and potentially infectious)

18. **E-waste primarily consists of:**
    a) Organic waste

b) Used electronics such as computers and mobile phones
c) Food waste
d) Construction debris
(Correct answer: b) Used electronics such as computers and mobile phones)

19. **Which of these is a safe method of disposing biomedical waste?**
a) Landfilling untreated waste
b) Open burning
c) Autoclaving and incineration
d) Dumping into rivers
(Correct answer: c) Autoclaving and incineration)

20. **The primary source of e-waste is:**
a) Agricultural runoff
b) Discarded electronic devices
c) Industrial gases
d) Food packaging
(Correct answer: b) Discarded electronic devices)

21. **Which is a significant environmental impact of improper solid waste management?**
a) Improved soil quality
b) Groundwater contamination from landfill leachate
c) Reduced greenhouse gas emissions
d) Decreased water pollution
(Correct answer: b) Groundwater contamination from landfill leachate)

22. **Recycling is an important method of managing:**
a) Non-recyclable waste
b) Solid waste, including plastics and metals
c) Biomedical waste
d) Acid rain pollutants
(Correct answer: b) Solid waste, including plastics and metals)

23. **The primary environmental hazard of e-waste is:**
a) Emission of sulfur dioxide
b) Release of toxic metals like lead and mercury into soil and water
c) Increase in crop production
d) Promotion of biodiversity
(Correct answer: b) Release of toxic metals like lead and mercury into soil and water)

24. **What is the main advantage of composting in solid waste management?**
a) Produces methane gas for energy generation

b) Converts organic waste into useful manure
c) Eliminates the need for waste segregation
d) Prevents the emission of greenhouse gases
(Correct answer: b) Converts organic waste into useful manure)

25. **Biomedical waste must be managed separately because:**
a) It is always recyclable
b) It poses a risk of infection and environmental contamination
c) It has no impact on human health
d) It is non-biodegradable
(Correct answer: b) It poses a risk of infection and environmental contamination)

26. **Which method is commonly used for e-waste disposal?**
a) Burning in open pits
b) Recycling and safe recovery of valuable materials
c) Dumping into oceans
d) Mixing with municipal waste
(Correct answer: b) Recycling and safe recovery of valuable materials)

27. **What is a significant risk of untreated biomedical waste?**
a) Soil erosion
b) Spread of infectious diseases
c) Increase in crop yields
d) Reduction in urban solid waste
(Correct answer: b) Spread of infectious diseases)

28. **Landfilling is a common method used to dispose of:**
a) Biomedical waste
b) Non-biodegradable solid waste
c) E-waste
d) Liquid industrial waste
(Correct answer: b) Non-biodegradable solid waste)

29. **Which of the following is a characteristic of hazardous e-waste?**
a) It is always biodegradable.
b) It contains toxic metals like cadmium and lead.
c) It is harmless to human health.
d) It decomposes within a week.
(Correct answer: b) It contains toxic metals like cadmium and lead.)

30. **A major benefit of e-waste recycling is:**
a) Reduced consumption of natural resources
b) Increased landfills
c) Reduced soil fertility

d) Increased air pollution
(Correct answer: a) Reduced consumption of natural resources)

31. **Which of the following air pollutants is mainly emitted from burning fossil fuels?**
a) Nitrogen oxides
b) Chlorofluorocarbons (CFCs)
c) Ammonia
d) Hydrochloric acid
(Correct answer: a) Nitrogen oxides)

32. **How does acid rain affect soil fertility?**
a) It enhances nutrient availability.
b) It leaches essential nutrients like calcium and magnesium.
c) It decreases the pH of the soil.
d) It promotes plant growth.
(Correct answer: b) It leaches essential nutrients like calcium and magnesium)

33. **Which of the following gases is NOT a greenhouse gas?**
a) Methane
b) Oxygen
c) Carbon dioxide
d) Nitrous oxide
(Correct answer: b) Oxygen)

34. **The ozone layer is primarily located in which layer of the atmosphere?**
a) Troposphere
b) Stratosphere
c) Mesosphere
d) Thermosphere
(Correct answer: b) Stratosphere)

35. **The primary environmental concern of automobile emissions is:**
a) Release of large quantities of water vapor
b) Contribution to air pollution and smog formation
c) Increase in soil fertility
d) Stabilization of global temperatures
(Correct answer: b) Contribution to air pollution and smog formation)

36. **Which of the following is a long-term solution for controlling automobile pollution?**
a) Increasing the use of diesel-powered vehicles
b) Transitioning to electric and hydrogen-powered vehicles
c) Reducing the use of catalytic converters

d) Expanding fossil fuel refineries
(Correct answer: b) Transitioning to electric and hydrogen-powered vehicles)

37. **A major consequence of global warming is:**
a) Decrease in sea levels
b) More extreme weather events like floods and droughts
c) Reduction in atmospheric water vapor
d) Global cooling
(Correct answer: b) More extreme weather events like floods and droughts)

38. **The presence of ground-level ozone primarily affects:**
a) Climate stability
b) Respiratory health in humans
c) Ocean biodiversity
d) Soil fertility
(Correct answer: b) Respiratory health in humans)

39. **Which pollutant causes photochemical smog?**
a) Hydrocarbons and nitrogen oxides
b) Chlorofluorocarbons
c) Lead and mercury
d) Sulfur dioxide
(Correct answer: a) Hydrocarbons and nitrogen oxides)

40. **Which international agreement focuses on reducing greenhouse gas emissions?**
a) Paris Agreement
b) Montreal Protocol
c) Stockholm Convention
d) Basel Convention
(Correct answer: a) Paris Agreement)

41. **What is a key environmental impact of the thinning ozone layer?**
a) Increase in infrared radiation
b) Increased penetration of harmful ultraviolet (UV) rays
c) Reduction in nitrogen levels in the atmosphere
d) Decrease in greenhouse gas concentration
(Correct answer: b) Increased penetration of harmful ultraviolet (UV) rays)

42. **Which of the following pollutants is responsible for smog formation in urban areas?**
a) Particulate matter and sulfur dioxide
b) Chlorofluorocarbons and methane
c) Carbon monoxide and lead

d) Hydrogen sulfide and ammonia
(Correct answer: a) Particulate matter and sulfur dioxide)

43. **A significant contributor to ozone layer depletion is:**
a) Methane emissions from livestock
b) Release of halons from fire extinguishers
c) Increased particulate matter in the atmosphere
d) Acid rain
(Correct answer: b) Release of halons from fire extinguishers)

44. **What is the main purpose of carbon credits?**
a) To provide financial incentives for reducing greenhouse gas emissions
b) To increase fossil fuel consumption
c) To stabilize energy production from coal
d) To fund urban development projects
(Correct answer: a) To provide financial incentives for reducing greenhouse gas emissions)

45. **Which of the following measures helps reduce urban air pollution?**
a) Planting urban forests and creating green belts
b) Increasing the number of high-speed highways
c) Promoting the use of open burning for waste disposal
d) Reducing public transportation systems
(Correct answer: a) Planting urban forests and creating green belts)

46. **Which type of solid waste contributes the most to municipal waste?**
a) Organic waste
b) Industrial waste
c) Hazardous waste
d) Radioactive waste
(Correct answer: a) Organic waste)

47. **A major source of biomedical waste is:**
a) Agriculture
b) Healthcare facilities like hospitals and clinics
c) Residential areas
d) Mining industries
(Correct answer: b) Healthcare facilities like hospitals and clinics)

48. **The primary environmental issue caused by improper e-waste disposal is:**
a) Air pollution
b) Soil and water contamination with toxic heavy metals
c) Increased greenhouse gas emissions

d) Decrease in soil fertility
(Correct answer: b) Soil and water contamination with toxic heavy metals)

49. **Incineration is commonly used to dispose of:**
a) Recyclable plastics
b) Organic compost
c) Hazardous biomedical waste
d) Metals from e-waste
(Correct answer: c) Hazardous biomedical waste)

50. **Which of the following is an effective method of e-waste management?**
a) Open dumping of electronics
b) Recycling and material recovery
c) Landfilling without treatment
d) Burning e-waste in urban areas
(Correct answer: b) Recycling and material recovery)

51. **What is a common source of hazardous waste in municipal areas?**
a) Electronics containing lead and mercury
b) Food packaging waste
c) Cardboard and paper products
d) Tree trimmings
(Correct answer: a) Electronics containing lead and mercury)

52. **Biomedical waste is categorized based on:**
a) Its colour and chemical composition
b) Its potential to cause infection or environmental harm
c) Its weight and volume
d) The location where it is generated
(Correct answer: b) Its potential to cause infection or environmental harm)

53. **Which waste disposal method involves decomposing organic waste into manure?**
a) Recycling
b) Composting
c) Incineration
d) Landfilling
(Correct answer: b) Composting)

54. **The Basel Convention regulates the:**
a) International movement of hazardous and e-waste
b) Reduction of greenhouse gases
c) Recycling of municipal solid waste

d) Safe disposal of nuclear waste
(Correct answer: a) International movement of hazardous and e-waste)

55. **What is a major benefit of using autoclaves for treating biomedical waste?**
a) High energy efficiency
b) Safe sterilization and destruction of infectious waste
c) Low operational costs
d) Rapid composting
(Correct answer: b) Safe sterilization and destruction of infectious waste)

56. **Which of the following is a hazardous material commonly found in e-waste?**
a) Aluminium
b) Lead
c) Cellulose
d) Rubber
(Correct answer: b) Lead)

57. **One of the most effective ways to manage solid waste in urban areas is to:**
a) Promote source segregation and recycling
b) Increase landfill capacity
c) Dump waste in water bodies
d) Burn all solid waste in open areas
(Correct answer: a) Promote source segregation and recycling)

58. **A key challenge in managing biomedical waste is:**
a) Lack of proper color-coded segregation
b) Excessive recycling of organic waste
c) Increase in urban sprawl
d) Reduction in e-waste generation
(Correct answer: a) Lack of proper color-coded segregation)

59. **The primary aim of waste minimization is to:**
a) Reduce the volume and toxicity of waste generated
b) Expand landfill sites
c) Increase production of single-use plastics
d) Stabilize urban population growth
(Correct answer: a) Reduce the volume and toxicity of waste generated)

60. **Which technology is most commonly used to recover valuable materials from e-waste?**
a) Incineration
b) Hydrometallurgical and pyrometallurgical processes
c) Landfilling

d) Composting

(Correct answer: b) Hydrometallurgical and pyrometallurgical processes)

MODULE 5

Introduction to GIS & Remote sensing, Applications of GIS & Remote Sensing in Environmental Engineering Practices

Environmental Acts & Regulations, Role of government, Legal aspects, Role of Non-governmental Organizations (NGOs), Environmental Education & Women Education

1. **What does GIS stand for?**
   a) Global Information System
   b) Geographic Information System
   c) Geographical Integration Software
   d) General Information System
   (Correct answer: b) Geographic Information System)

2. **The primary function of GIS is to:**
   a) Store and analyze spatial data
   b) Predict weather patterns
   c) Generate biodiversity maps
   d) Manage urban transportation systems exclusively
   (Correct answer: a) Store and analyze spatial data)

3. **Which of the following is NOT a component of GIS?**
   a) Hardware
   b) Software
   c) Data
   d) Fossil fuels
   (Correct answer: d) Fossil fuels)

4. **Remote sensing primarily involves the collection of data from:**
   a) Satellites and aircraft
   b) Underground drilling
   c) Ocean currents
   d) Road networks
   (Correct answer: a) Satellites and aircraft)

5. **The two main types of remote sensing are:**
   a) Active and passive remote sensing
   b) Spatial and temporal sensing
   c) Satellite and radar sensing
   d) Geographic and atmospheric sensing
   (Correct answer: a) Active and passive remote sensing)

6. **Which of the following is an example of passive remote sensing?**
   a) Radar

b) LIDAR
c) Aerial photography
d) SONAR
(Correct answer: c) Aerial photography)

7. **What type of sensor is used in active remote sensing?**
   a) Infrared sensor
   b) Radar
   c) Visible light sensor
   d) Photographic camera
   (Correct answer: b) Radar)

8. **Which of the following is NOT an application of GIS in environmental engineering?**
   a) Groundwater modeling
   b) Wastewater treatment
   c) Satellite TV broadcasting
   d) Urban planning
   (Correct answer: c) Satellite TV broadcasting)

9. **GIS is commonly used to analyze which type of data?**
   a) Temporal data only
   b) Spatial and attribute data
   c) Financial data exclusively
   d) Climate data only
   (Correct answer: b) Spatial and attribute data)

10. **What is the purpose of overlay analysis in GIS?**
    a) To analyze 3D images of water bodies
    b) To combine multiple layers of spatial data for analysis
    c) To predict rainfall patterns
    d) To convert raster data to vector data
    (Correct answer: b) To combine multiple layers of spatial data for analysis)

11. **A key environmental application of remote sensing is:**
    a) Monitoring deforestation
    b) Increasing mining output
    c) Decreasing water purification
    d) Promoting tourism
    (Correct answer: a) Monitoring deforestation)

12. **Which of the following is a spatial data model used in GIS?**
    a) Vector model
    b) Boolean model

c) Numeric model
d) Quantitative model
(Correct answer: a) Vector model)

13. **Remote sensing is used in flood management to:**
a) Track and predict flood-prone areas
b) Regulate urban water usage
c) Increase groundwater levels
d) Build dams
(Correct answer: a) Track and predict flood-prone areas)

14. **Which electromagnetic radiation is commonly used in remote sensing?**
a) Gamma rays
b) Infrared radiation
c) X-rays
d) Ultraviolet radiation
(Correct answer: b) Infrared radiation)

15. **In GIS, the term "attribute data" refers to:**
a) Location-based information
b) Descriptive data associated with spatial features
c) Temporal changes in climate
d) Aerial photographs
(Correct answer: b) Descriptive data associated with spatial features)

16. **The Environmental Protection Act in India was passed in:**
a) 1986
b) 1994
c) 1972
d) 2000
(Correct answer: a) 1986)

17. **Which act focuses on the prevention and control of water pollution in India?**
a) Air (Prevention and Control of Pollution) Act
b) Water (Prevention and Control of Pollution) Act
c) Forest Conservation Act
d) Wildlife Protection Act
(Correct answer: b) Water (Prevention and Control of Pollution) Act)

18. **The Air (Prevention and Control of Pollution) Act was introduced in:**
a) 1974
b) 1981
c) 1990

d) 1986
(Correct answer: b) 1981)

19. **The Forest Conservation Act aims to:**
    a) Monitor urban air quality
    b) Protect and conserve forests and biodiversity
    c) Control water pollution
    d) Promote women's education
    (Correct answer: b) Protect and conserve forests and biodiversity)

20. **Which of the following is NOT a role of the government in environmental protection?**
    a) Enforcing environmental laws
    b) Promoting awareness campaigns
    c) Monitoring compliance
    d) Generating hazardous waste
    (Correct answer: d) Generating hazardous waste)

21. **NGOs play a crucial role in environmental conservation by:**
    a) Developing environmental policies
    b) Conducting grassroots campaigns and advocacy
    c) Issuing fines for environmental violations
    d) Managing national budgets
    (Correct answer: b) Conducting grassroots campaigns and advocacy)

22. **Which international organization is known for its work in environmental conservation?**
    a) United Nations Environment Programme (UNEP)
    b) World Health Organization (WHO)
    c) International Monetary Fund (IMF)
    d) World Bank
    (Correct answer: a) United Nations Environment Programme (UNEP))

23. **Environmental education focuses on:**
    a) Teaching the importance of economic growth
    b) Increasing knowledge and awareness about environmental issues
    c) Promoting urban development
    d) Generating more hazardous waste
    (Correct answer: b) Increasing knowledge and awareness about environmental issues)

24. **Which act in India regulates the management and disposal of hazardous waste?**
    a) Environmental Protection Act

b) Hazardous Waste Management Rules
c) Wildlife Protection Act
d) Air (Prevention and Control of Pollution) Act
(Correct answer: b) Hazardous Waste Management Rules)

25. **The Chipko Movement is an example of:**
a) Government intervention in air pollution
b) Community-based Forest conservation
c) Urban water management practices
d) Industrial wastewater treatment
(Correct answer: b) Community-based forest conservation)

26. **Which of the following is a key focus of women's education in environmental conservation?**
a) Increasing literacy rates exclusively
b) Empowering women to lead sustainable practices
c) Reducing male participation in environmental activities
d) Promoting urban sprawl
(Correct answer: b) Empowering women to lead sustainable practices)

27. **The role of environmental education includes:**
a) Encouraging sustainable development practices
b) Increasing dependence on fossil fuels
c) Expanding deforestation activities
d) Promoting monoculture farming
(Correct answer: a) Encouraging sustainable development practices)

28. **Which is NOT a legal aspect of environmental protection?**
a) Enforcing pollution control measures
b) Monitoring compliance with environmental laws
c) Penalizing violators
d) Promoting overuse of natural resources
(Correct answer: d) Promoting overuse of natural resources)

29. **Which of the following is a key responsibility of NGOs in environmental protection?**
a) Passing environmental laws
b) Organizing awareness programs and conservation projects
c) Regulating industrial emissions
d) Managing state budgets
(Correct answer: b) Organizing awareness programs and conservation projects)

30. **Which document sets the global framework for sustainable development?**
a) Agenda 21

b) Montreal Protocol
c) Basel Convention
d) Paris Agreement
(Correct answer: a) Agenda 21)

31. **The term "spatial resolution" in remote sensing refers to:**
a) The wavelength of electromagnetic radiation
b) The smallest object that can be detected by a sensor
c) The time between successive observations
d) The frequency of satellite transmissions
(Correct answer: b) The smallest object that can be detected by a sensor)

32. **Which of the following is a limitation of GIS?**
a) Inability to analyze spatial data
b) High initial cost and technical expertise required
c) Lack of data integration capabilities
d) Limited applications in environmental studies
(Correct answer: b) High initial cost and technical expertise required)

33. **Which of the following is an example of raster data in GIS?**
a) Population census data
b) Satellite imagery
c) Administrative boundaries
d) Road networks
(Correct answer: b) Satellite imagery)

34. **The temporal resolution of a satellite refers to:**
a) The clarity of the images captured
b) The frequency at which data is captured for the same location
c) The number of spectral bands recorded
d) The size of the area covered in one image
(Correct answer: b) The frequency at which data is captured for the same location)

35. **Which of the following is an application of GIS in disaster management?**
a) Predicting the spread of oil spills
b) Designing water treatment plants
c) Increasing biodiversity
d) Reducing air pollution
(Correct answer: a) Predicting the spread of oil spills)

36. **In GIS, a "layer" represents:**
a) A physical sheet of a map
b) A thematic set of spatial data representing a specific feature
c) The hardware component of GIS

d) A collection of satellite images

(Correct answer: b) A thematic set of spatial data representing a specific feature)

37. **Which of the following software is commonly used in GIS?**
    a) AutoCAD
    b) ArcGIS
    c) MATLAB
    d) SPSS
    (Correct answer: b) ArcGIS)
38. **Remote sensing plays a critical role in:**
    a) Mapping urban heat islands
    b) Analyzing medical statistics
    c) Monitoring classroom attendance
    d) Designing industrial equipment
    (Correct answer: a) Mapping urban heat islands)
39. **Which of the following satellites is commonly used for remote sensing in environmental studies?**
    a) GPS satellites
    b) Landsat satellites
    c) Communication satellites
    d) Navigation satellites
    (Correct answer: b) Landsat satellites)
40. **GIS supports sustainable development by:**
    a) Storing outdated data
    b) Mapping natural resources and planning efficient usage
    c) Increasing urban sprawl
    d) Reducing the need for environmental policies
    (Correct answer: b) Mapping natural resources and planning efficient usage)
41. **The term "spectral resolution" in remote sensing refers to:**
    a) The number of spectral bands a sensor can detect
    b) The size of the image captured
    c) The cost of the satellite
    d) The altitude of the satellite
    (Correct answer: a) The number of spectral bands a sensor can detect)
42. **Which of the following is an example of vector data in GIS?**
    a) Satellite images
    b) Elevation models
    c) River networks represented as lines
    d) Aerial photographs
    (Correct answer: c) River networks represented as lines)
43. **The use of GIS in water resource management includes:**
    a) Mapping flood-prone areas

b) Building communication towers
c) Installing air filters
d) Measuring soil pH
(Correct answer: a) Mapping flood-prone areas)

44. **Which type of remote sensing is suitable for night-time observation?**
a) Passive remote sensing
b) Active remote sensing
c) Temporal sensing
d) Geosynchronous sensing
(Correct answer: b) Active remote sensing)

45. **A key benefit of integrating GIS and remote sensing is:**
a) Monitoring environmental changes in real-time
b) Increasing computational requirements
c) Decreasing the accuracy of spatial data
d) Reducing the scope of environmental engineering
(Correct answer: a) Monitoring environmental changes in real-time)

46. **Which of the following is a key objective of the Wildlife Protection Act, 1972?**
a) Promoting agriculture near wildlife habitats
b) Conserving wildlife and preventing illegal poaching
c) Regulating air pollution in urban areas
d) Enhancing industrial production
(Correct answer: b) Conserving wildlife and preventing illegal poaching)

47. **The Environment Impact Assessment (EIA) process aims to:**
a) Analyze the economic viability of projects
b) Assess potential environmental impacts of proposed projects
c) Increase urban development without restrictions
d) Eliminate environmental regulations
(Correct answer: b) Assess potential environmental impacts of proposed projects)

48. **Which Indian environmental act governs hazardous waste management?**
a) Forest Conservation Act
b) Environment Protection Act
c) Hazardous Waste (Management and Handling) Rules
d) Wildlife Protection Act
(Correct answer: c) Hazardous Waste (Management and Handling) Rules)

49. **NGOs contribute to environmental protection by:**
a) Drafting national budgets
b) Conducting awareness campaigns and advocacy
c) Passing laws
d) Monitoring industrial production
(Correct answer: b) Conducting awareness campaigns and advocacy)

50. **The Clean Energy Cess in India is primarily associated with:**
    a) Controlling water pollution
    b) Promoting renewable energy by taxing coal consumption
    c) Reducing automobile emissions
    d) Encouraging sustainable agriculture
    (Correct answer: b) Promoting renewable energy by taxing coal consumption)
51. **What is the role of women's education in environmental conservation?**
    a) Promoting awareness and leadership in sustainable practices
    b) Restricting women to urban areas
    c) Increasing deforestation
    d) Reducing the role of NGOs
    (Correct answer: a) Promoting awareness and leadership in sustainable practices)
52. **Which act regulates the protection of air quality in India?**
    a) Wildlife Protection Act
    b) Air (Prevention and Control of Pollution) Act
    c) Environmental Protection Act
    d) National Green Tribunal Act
    (Correct answer: b) Air (Prevention and Control of Pollution) Act)
53. **Environmental education promotes:**
    a) Awareness and action to address environmental challenges
    b) The industrialization of forested areas
    c) Expansion of mining activities
    d) Increased dependence on fossil fuels
    (Correct answer: a) Awareness and action to address environmental challenges)
54. **What is the purpose of the National Green Tribunal (NGT) in India?**
    a) Promoting urban development
    b) Resolving environmental disputes and enforcing regulations
    c) Overseeing international trade policies
    d) Reducing the role of NGOs
    (Correct answer: b) Resolving environmental disputes and enforcing regulations)
55. **The role of environmental education in schools is to:**
    a) Encourage sustainable behaviors and practices among students
    b) Prioritize economic growth over environmental protection
    c) Eliminate biodiversity conservation
    d) Promote wasteful consumption patterns
    (Correct answer: a) Encourage sustainable behaviors and practices among students)
56. **Which of the following is a key focus of Agenda 21?**
    a) Biodiversity conservation and sustainable development
    b) Increased fossil fuel consumption

c) Eliminating renewable energy programs
d) Expanding urban sprawl
(Correct answer: a) Biodiversity conservation and sustainable development)

57. **Which NGO is known for its global campaigns on climate change?**
a) Greenpeace
b) World Trade Organization (WTO)
c) Amnesty International
d) International Monetary Fund (IMF)
(Correct answer: a) Greenpeace)

58. **Which of the following is a key legal framework for biodiversity protection in India?**
a) Biodiversity Act, 2002
b) Air (Prevention and Control of Pollution) Act
c) National Green Tribunal Act
d) E-Waste Management Rules
(Correct answer: a) Biodiversity Act, 2002)

59. **What is the primary goal of sustainable development in environmental policies?**
a) To balance economic growth with environmental conservation
b) To increase natural resource extraction
c) To expand urbanization without regulations
d) To prioritize industrial profits
(Correct answer: a) To balance economic growth with environmental conservation)

60. **Which of the following represents a grassroots environmental initiative in India?**
a) Chipko Movement
b) Green Revolution
c) White Revolution
d) Space Research Programs
(Correct answer: a) Chipko Movement)
